

## How to upgrade your AVG Free to the latest AVG 8.5 Free Edition

*To install AVG 8.5 Free Edition over the current AVG Free Edition please proceed as follows:*

- \* Download the latest AVG 8.5 Free Edition installation file from our website.*
- \* When you are prompted, please do not open this file directly from the Internet, but click the "Save" button and choose a location, where the installation file should be stored (we recommend saving the file to the Desktop).*
- \* Reboot your computer.*
- \* Close all running applications, locate the downloaded AVG 8.5 Free Edition installation file (it has a four color square icon and its name starts with AVG\_...) and launch the installation.*
- \* Follow the installation wizard to install the new AVG 8.5 Free Edition (previous version of AVG will be automatically removed during the installation process).*
- \* If a restart is required after the initial configuration, please reboot your computer to finish the installation.*

DONE!
